EDUCATION

Bachelor of Engineering, 2023-2027
Computer Science

Annai Mira College of Engineerinng and technology

SKILLS

- Analytical problem-solving
- Expertise in social engineering tactics
- OS management
- Team coordination
- React development
- Experienced in Python programming

ABOUT ME

Dynamic professional with a excelling in Python programming and real-time intrusion detection. Adept at analytical problem-solving and team coordination, I leverage expertise in social engineering tactics to enhance security measures, driving significant improvements in system integrity and team performance.

PROJECTS

Mental Health Assistant

Implemented document retrieval and text-to-text AI responses to improve relevance and accuracy. Focused on responsible AI usage and user-friendly interaction.

Logo Genius

The system generates logos from user-provided text prompts and allows users to download the generated logos. Gained hands-on experience in generative AI, RAG pipelines, and end-to-end AI web application development.

Viva Preparation Bot

Used to help students prepare for academic vivas by providing accurate, context-aware answers to viva questions through a text-to-text RAG-based AI model.

CERTIFICATES

- Full Stack Developer Certificate (Novi tech)
- Deloitte Cyber Simulation
- Ethical Hacking Certificate (NPTEL)
- Mastering Figma to Expert UI/UX (GUVI / HCL)
